

## challenge

Data explosion  
- let's go DIGITAL !

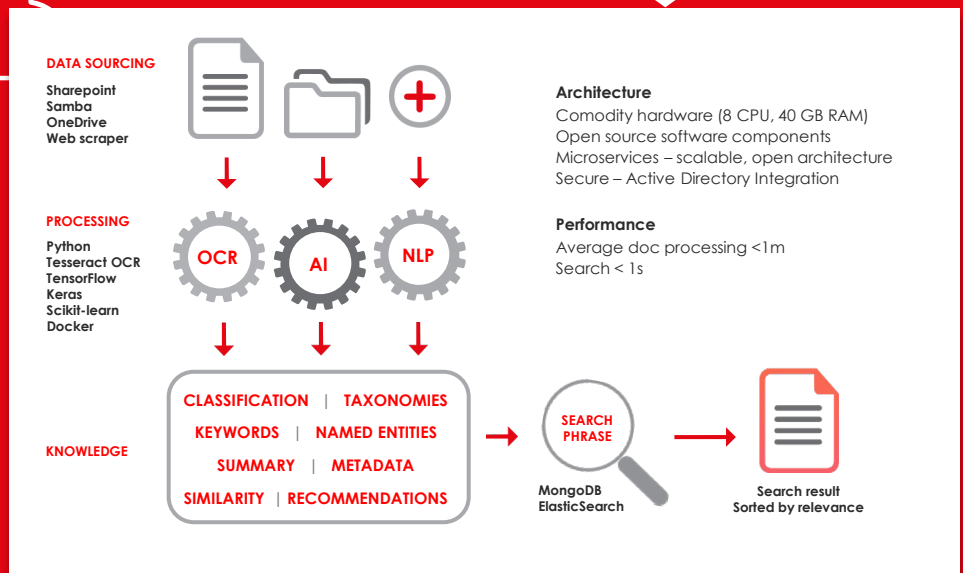

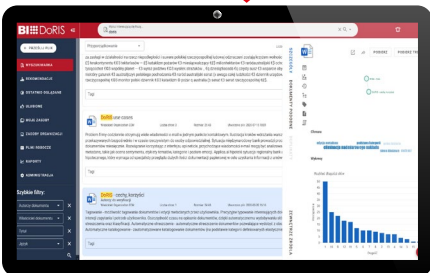

Data silos  
Dark data  
Unstructured data  
Huge data volumes

## solution

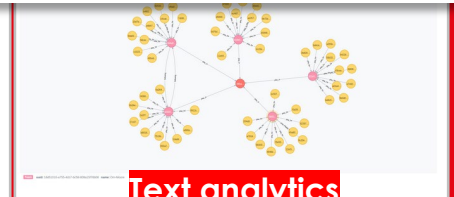

Information Hub  
Centralized access  
No-brainer search  
Automated knowledge extraction

**EOSC infrastructure and ML/DL services**

Documents relationships network

Text analytics stylometry

Launching a demo version of the DoRIS in the cloud

Validating the potentials of the services created in the DEEP

Hybrid Datacloud and investigating possible integration

Plans for onboarding in EOSC marketplace

Embed a production instance that would be commercially available to clients in the cloud model

on the roadmap

Image processing search with picture
