Collaborate or Compete?

EOSC-Hub Week, Prague 2019-04-10

EOSC for Social Sciences and Humanities Panel

Matej Ďurčo

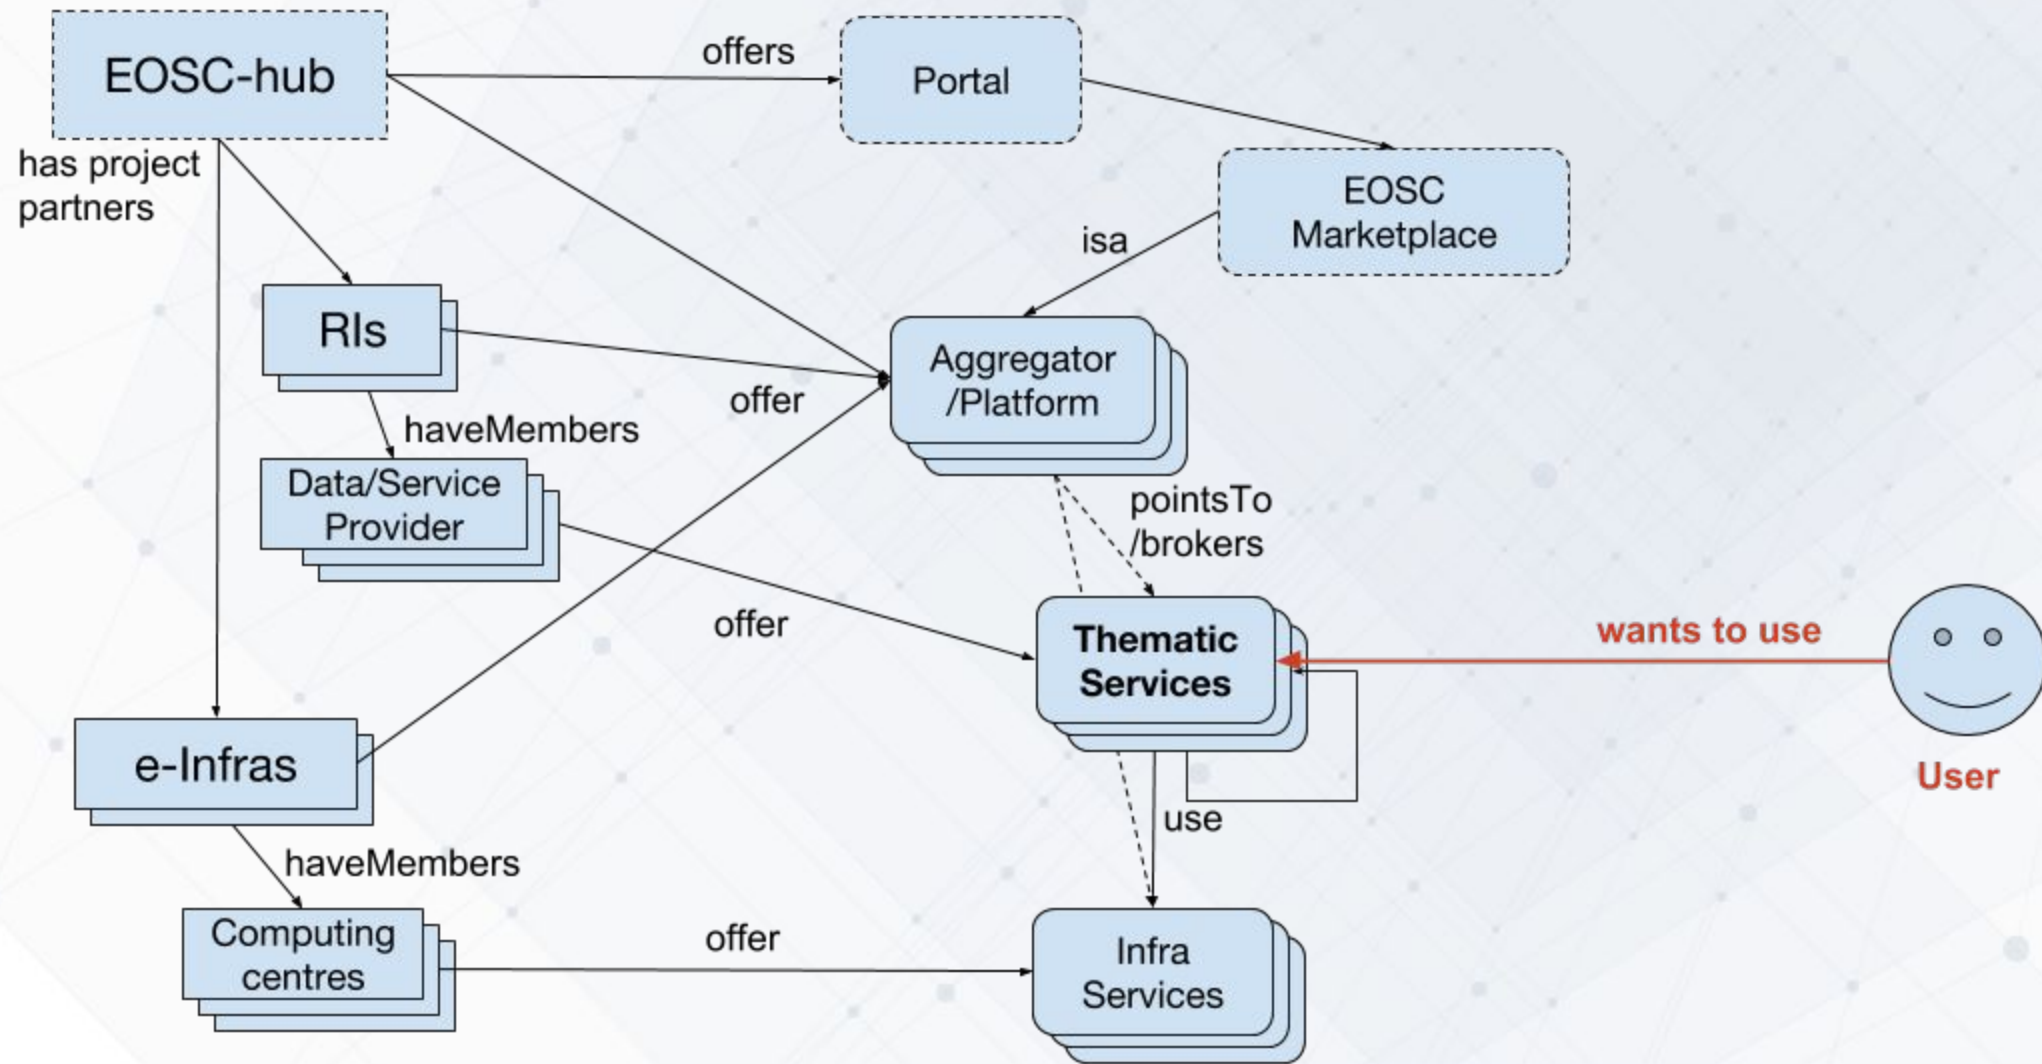

Services everywhere

- More and more (e-)services being offered (XaaS)
- by more and more players
- announced/brokered via more and more “platforms”
- EOSC as pan-European ecosystem of services for ERA
- Services can be complementary to each other, or in competition
- Can/Should competition (redundancy) be avoided/minimized, or do we need to accept and even embrace it?

Stakeholder and their “Services”

SSHOC Marketplace

- Bazaar of ideas, Knowledge Hub
- Main entity not Services, but **Solutions/Workflows/Recipes/Scenarios/User stories**
- Accompanying the research process /
Guided by the research practices of the respective communities
(*Communities of practice*)
- Data, Scripts, **Tools** & Services *auxiliary* to Solutions.
- Contextualisation, Community, Curation
- Strong link to training

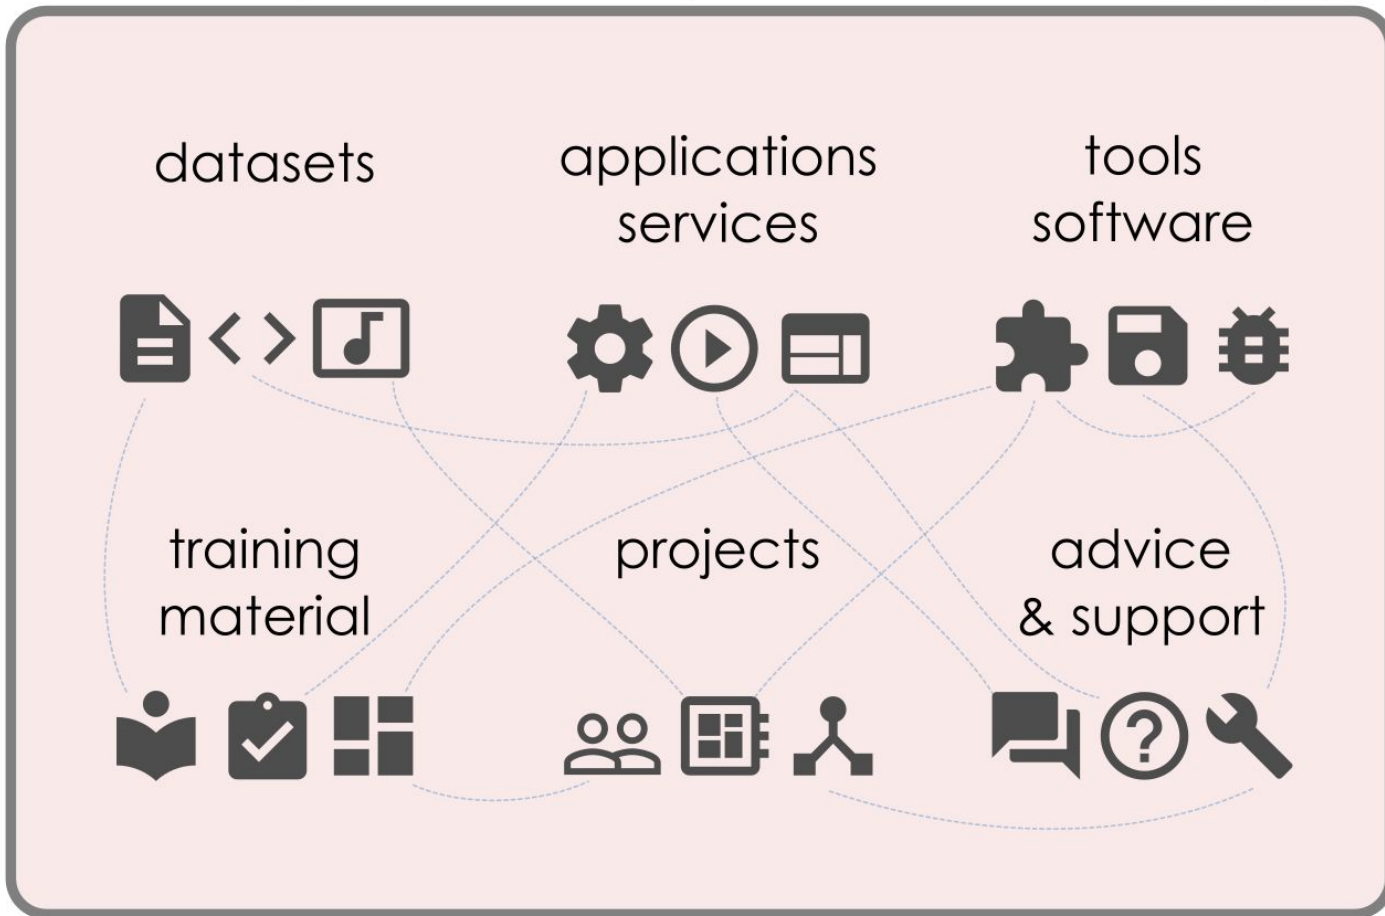

SSH Open Marketplace

-  share

-  collaborate

-  visibility

-  credit

-  explore & discover

-  access & use

-  feedback

EOSC Marketplace <-?-> SSHOC Marketplace

Working hypotheses:

- SSHOCMP Solutions complementary to EOSCMP Services
- SSHOCMP points to Services on EOSC(MP)
- SSHOCMP uses (depends on) EOSC (Infra) Services
- SSHOCMP is an EOSC service

- EOSCMP is deployed, SSHOCMP is an idea
- EOSCMP moving towards SSHOCMP (feature-wise):
contextualisation, user review, dashboard,
composition of services, compatible services,
supporting user: “What could I use from MP?”

EOSC Marketplace <-?-> SSHOC Marketplace

Working hypotheses:

- SSHOCMP Solutions complementary to EOSCMP Services
- SSHOCMP points to Services on EOSC(MP)
- SSHOCMP uses (depends on) EOSC (Infra) Services
- SSHOCMP is an EOSC service

- EOSCMP is deployed, SSHOCMP is an idea
- EOSCMP moving towards SSHOCMP (feature-wise):
contextualisation, user review, dashboard,
composition of services, compatible services
supporting user: ~~“What could I use from MP?”~~
“How can I solve the problem at hand?”
