My cloud, your cloud, our cloud
some notes on governance alignment

Franciska de Jong

EOSC-hub week, Prague, 10 April 2019

Cloud governance

- SSH Open Cloud (SSHOC) and conditions for sustainability: responsibility, ownership, funding
- At stake: potential for
    - consolidation of SSH 'heritage'
    - multidisciplinary collaboration
- SSHOC and EOSC:
    - Can EOSC incorporate the results of collaborations in cluster projects?
    - Can cluster projects act as a conduit of products and results into EOSC?
- Implications
    - at the level of funding (who gets access under which fee model)
    - at the level of governance (who decides what)

SSHOC parties in the EOSC landscape

- SSHOC stakeholders: CESSDA, CLARIN, DARIAH, E-RIHS, ESS, SHARE (a few more may enter soon)
- Different levels of EOSC and e-Infra involvement:
    - CLARIN ERIC and some DARIAH partners are involved in EOSC-hub
    - other partners were involved in the EOSC pilots, and
    - SSHOC/CESSDA participation in EOSC-hub strategy board
    - SSH represented in EOSC executive board
- Challenge: how to manage the diversity and the need for alignment of strategies
    - at the disciplinary level
    - at the national level
    - at the European level

Urgent actions

- Analyse and discuss the options that may foster sustainability:
    - Using/sharing data management services from EOSC-hub
    - Sharing community-specific services with others
    - Identifying future-proof EOSC-hub solutions
    - Determining which community solutions remain preferable

- Arrange the exchange of SSH needs and requirements with the EOSC leadership (generic service developers, governing bodies, policy makers, …)

- Identify and/or initiate dynamics in the funding of European research infrastructures.

- The SSH communities need to develop a vision on what EOSC should bring.

- *It is our cloud too!*
